

The Kyocera Mobile Print app enables mobile users to simply and conveniently print files, web pages, and images on demand.

PRINT CAPABILITIES TO MATCH YOUR ON-THE-GO WORK STYLE

Today's business environment is becoming increasingly mobile. Frequent travel, working between multiple locations, and virtual offices bring with them new demands for on-the-go access to files and documents. Smart phones, tablets and laptops meet the need for digital access to content, but digital access is often not enough. The mobile workforce is looking to transform their entire office into a mobile experience, and requires print and scan capabilities that mirror the flexibility of their mobile devices. Kyocera rises to the challenge with Mobile Print, a unique application that enables mobile users to simply and conveniently print documents, web pages, and images on demand from their Apple and Android smart phone and tablet devices to select Kyocera MFPs and Printers. As an added feature, users can scan files and images from Kyocera MFPs to their mobile devices.

The Kyocera Mobile Print app puts YOU in control of your document imaging, eliminating the need to carry cumbersome printed files on the chance you need them. Additionally this app eliminates the hassle and lack of security associated with emailing files to someone connected to a network in order to have them printed for you. Mobile Print empowers your workflow while giving you the confidence in knowing you are prepared for anything and able to access and print your important documents from almost anywhere.

3 EASY STEPS TO PRINTING ON THE GO

- Connect your mobile device to the same Wi-Fi network as the Kyocera MFP or Printer you will be using to print.
- Use the Mobile Print app to open the document, image or web page you wish to print.
- Select the device you wish to print to, set your preferences and press Print.

It's that simple!

Bringing Convenience and Versatility to Mobile Printing and Scanning

WITH KYOCERA MOBILE PRINT, YOUR MOBILE DEVICE DOES ALL THE WORK, BECOMING AN INTEGRATED PART OF YOUR DOCUMENT WORKFLOW.

There's no need to be physically connected to a corporate network; the app can quickly identify Kyocera Printers and MFPs via a Wi-Fi connection. Once you've located a device, simply access the documents you want to print. The app can handle many common file formats. A few quick strokes are all it takes to transform digital files, scans and images to printed sheets. A wide array of settings including quality, duplex, pages per sheet, job accounting and more maximizes output control. Mobile Print integrates with email and Evernote, further enhancing the print versatility of your mobile device. You can even print web pages accessed through the app's built-in web browser.

Scanning documents to your mobile device has never been easier. Simply scan the desired content with any supported Kyocera MFP, and then conveniently send it to a mobile device where it can be stored, accessed as needed, or shared as an email attachment, enabling you to continue to work while on the go.

THE BENEFITS OF KYOCERA MOBILE PRINT

- Print on the go in a mobile environment via an app that is free, convenient, and easy to use
- Flexible access to information wherever you need it
- No costly or burdensome infrastructure required - the app resides on the mobile device and interfaces seamlessly with select Kyocera MFPs and Printers
- Automated identification of compatible devices
- Robust settings enable greater control:
 - Print* - Quality, Paper Size, Duplex, Color, Pages per Sheet, Number of Copies, Page Range, Job Accounting, Staple, Punch
 - Scan* - File Name, Original Size, Quality, Color, Resolution
- Accountability - track print jobs when job accounting is enabled at the MFP or printer
- Protect sensitive information by eliminating the need to email documents to a network-connected third party for printing
